SUMMARY

Frontend-focused developer building and shipping real web platforms, including a live alumni engagement system and production-grade portfolio applications. I work primarily in React and Next.js, focusing on frontend architecture, dashboards, and data-driven interfaces that support real workflows. My projects emphasize clarity, usability, and system alignment over feature count.

ACADEMIC PROJECTS

Alumni Engagement Platform ([Slu Alumni Connect](#))

Nov 2025

Next.js | React | Python | Rest API's | Vercel

- Developed a live alumni engagement platform prototype as a major Master's project, centralizing alumni profiles, events, mentorship, and engagement tracking.
- Led frontend development using Next.js, translating system architecture and ERDs into a dashboard-driven, user-focused interface.
- Integrated backend APIs and data services to support dynamic workflows across events, RSVPs, and dashboards.
- Generated synthetic datasets using Python libraries to simulate realistic engagement patterns while ensuring ethical data usage.
- Deployed the application on Vercel with version control via GitHub.
