

Harsha Asapu

[Portfolio-website](#) · [LinkedIn](#) · harshaasapu.b@gmail.com · OPT Authorized

Product designer focused on interaction design, behavioral systems, and shippable UX. 2+ years building web products end-to-end across frontend and design roles. Skilled in Figma, design systems, prototyping, and frontend implementation (React, Next.js, TypeScript).

EXPERIENCE

Community Dreams Foundation | UI/UX Designer 02/2026 - Present

- Designed low- and high-fidelity flows for DreamStream across [N] core user journeys in Figma; iterated through [N] review cycles with PMs and engineering
- Ran async design reviews via Slack and structured handoff docs; aligned scope with PM and dev constraints before shipping
- Applied behavioral and state-visibility principles from prior case studies (LifeOS, Starbucks) to nonprofit product challenges

BuiltinTech | Product Designer & Frontend Engineer 01/2023 - 12/2023

- Owned end-to-end design and frontend for 10+ client web products: discovery calls → requirements → wireframes → responsive UI → production handoff → post-launch iteration
- Translated unstructured client briefs into structured user flows and component libraries; refined based on real usage data, not assumed needs
- Drove 80% of new client acquisition through direct outreach, scoping conversations, and trust-building
- Recruited and managed interns from KL University through live project workflows

Areksoft Technologies | Frontend Developer 08/2022 – 12/2022

- Built responsive web interfaces in a production frontend environment; learned how design specs translate into shipped code in a structured team
- Gained Python/Flask exposure that turned feasibility into a design instinct rather than a downstream concern
- Supported brand and digital campaigns through Figma, Canva, and social asset design

PROJECTS

Starbucks Mobile Order Redesign - 2 weeks Figma | Smart Animate | FigJam | [Starbucks Redesign \(View it here\)](#)

- Diagnosed the real failure: not slow wait times, but zero in-app visibility into when the barista actually starts the drink a moment the product didn't model
- Rejected GPS-triggered pickup, queue-counter, and live barista cam before landing on a four-state model tied to actual barista actions
- Independently validated by Brian Niccol's Oct 2024 earnings call naming mobile order pickup a turnaround priority and citing inaccurate wait times
- Designed one reusable state card with non-punishing language and restrained color use (amber, not red) as a deliberate decision

LifeOS - Behavioral Productivity System - Figma | Behavioral Design | UX Research | [LifeOS UX Case study \(View it here\)](#)

- Built a behavioral productivity system that converts habit data into a feedback loop rather than a guilt machine
- Grounded the interaction model in cue-routine-reward principles and friction tuning every UI surface tied to a behavioral lever
- Designed a single dashboard that scales from one habit to thirty without UI re-architecture
- Documented rejected directions streak shame, badge gamification, AI nudges and why each broke the model

TECHNICAL SKILLS

Design - Figma (Auto Layout, Components, Prototyping, Responsive), Design Systems, Wireframing, Interaction Design, UX Research, Usability Testing, Information Architecture, Journey Mapping, FigJam, Low & High Fidelity Prototyping

Build - React · Next.js · TypeScript · Tailwind CSS · Framer Motion · HTML/CSS · Git/GitHub

Process - Agile · Jira · Behavioral Design · MoSCoW Prioritization · Usability Testing · Iterative Design

Data & AI - OpenAI API · RAG Systems · Power BI · DAX · Python · Prompt Design

EDUCATION

MS in Information Systems, Saint Louis University

Bachelors in Computer Science, KL University
